

start time (CEST)	Name	Title
Mon 30.Aug		
12:30	LUNCH	
14:00		Welcome and logistics
14:05	Gerry Gilmore, Gudrun Tausch-Pebody	OPTICON Alliance - present and future of small-medium observatories
14:35	Stephane Basa	Performance and Early Scientific Results from the Robotic COLIBRI Telescope
14:50	Silvano Tosi	Noctis: a network of italian robotic optical telescopes
15:05	Mohamed Kaab	Toward a Moroccan Time-Domain Follow-up Node: From Site Prequalification to Network Readiness
15:20	Edita Stonkute	Europlanet Telescope Network
15:35	Lukasz Wyrzykowski	The news on BHTOM and EASSTOM
16:00	coffee break	
18:00		Welcome cocktail
Tue 1.Sep		
09:30	Przemek Mikołajczyk	Good and bad practices in scientific imaging
10:00	Krzysztof Kotysz	Advances in CCDPhot Pipeline architecture
10:30	Fraser Gillan	BHTOM: The solar system perspective and platform development
11:00	coffee break	
11:30	Laurent Eyer	The variable sources of Gaia DR4
12:00	Simon Hodgkin, Lukasz Wyrzykowski	Gaia Alerts
12:30	Jaroslav Merc	Spectroscopic follow-up of Gaia emission-line stars with small telescopes
12:45	Tymoteusz Trzmielak	How high-resolution spectroscopy helps in searching for black holes in Gaia microlensing events.
13:00	LUNCH	
14:30	Nandini Hazra	Vera C. Rubin Observatory and Einstein Telescope: multi-messenger perspectives in the era of next generation gravitational-wave detectors
15:00	Hugo Tranin	REGALADE in the time-domain era: linking transients to their galaxies across the nearby Universe
15:15	Swayamtrupta Panda	SCORPIO - a new facility instrument for the Gemini South telescope geared for RAPID response
15:25	Emille Ishida	The Fink broker: a personalized window into the transient sky
15:55	Ilja Jaroschewski	Astro-COLIBRI: Overview over new features for MWL follow-ups
16:10	Kishalay De	Reimagining NEOWISE as a transient discovery engine
16:25	coffee break	
Optional meetings in small groups		
Wed 2.Sep		
09:30	Charlotte Angus	Probing gaps in the black hole mass spectrum with exotic transients
10:00	Stanisław Świercz	High-amplitude flares in galaxy centers - a case study
10:15	Nada Ihanec	Curious case of BFF Gaia19axp
10:30	Michał Miron	High energy observations with SST-1M Cherenkov Telescopes.
10:40	Franz-Josef Hambsch	Highlights of 15 years at ROAD
11:00	coffee break	
11:30	Anjasha Gangopadhyay	The landscape of fast interacting transients in the upcoming LSST era
12:00	Priscila Pessi	The puzzling SN 2024afyu
12:30	Joysankar Majumdar	SN 2019qem: A Long-Lived, Luminous Type IIin Supernova with Sustained Circumstellar Interaction
12:45	Manolis Xilouris	Helmos and Kryoneri observatories in Greece
13:00	LUNCH	
14:30	Fatemeh Zahra Majidi	Time-Domain Astronomy and the Next Big Leap in Star-Formation
15:00	Alceste Bonanos	First systematic study of dimming events in red supergiants
15:15	Anastasios (Andy) Tzanidakis	Dipper Stars as Tracers of Catastrophic Giant Impact Collisions
15:30	Erika Pakšienė	Multi-Site Observations and Asteroseismic Analysis of the DAV White Dwarf PG 2303+243
15:45	Andrii SIMON	BHTom: From Regular Photometry to the Outbursts Alerting System
15:55	Milena Ratajczak	Ellipsoidal Binaries in Sky Surveys
16:10	Waldemar Ogłóza	O-C diagrams in BHTOM era
16:25	coffee break	
CONFERENCE DINNER		
Thu 3.Sep		
09:30	Sahil Purabiya	Optical Follow-up of Transient Alerts from Indian Private Observatories
09:40	Teimuraz Kvernadze	Time-domain spectral observations of pulsating stars in Abastumani, Georgia
09:50	Miljana D. Jovanovic	Gaia Alerts and Serbian-Bulgarian activities during 2025
10:05	Marius Maskoliūnas	New observation opportunities at the Molėtai Astronomical Observatory
10:20	Justas Zdanavičius	Hot Subdwarfs asteroseismology at the Molėtai Astronomical Observatory
10:35	Krzysztof Dzedzej	60cm Cassegrain telescope in Ostrowik, Observations and History.
10:45	Alicja Pucek	Gravitationally lensed quasars with Gaia, LSST, and the BHTOM network
11:00	coffee break	
11:30	Thierry Midavaine	RAPAS Collaboration and Gaia Like Filters
11:45	Suleyman Fisek	Telescopes in Turkie
11:55	Ziad Mekawy	Egypt (TBC)
12:05	Jakub Nurkiewicz	BHTOM - Universal Exposure Estimator
12:20	Mikołaj Płoszyński	BHTOM - Universal Exposure Estimator
12:35	Zbigniew Grabowski	The AstroBox Project and the EASST Foundation Digital Observatory Network.
12:50	LUNCH	
14:30	Agnieszka Gurgul	SST Systems: from Astronomy to Space Safety
14:45	Paulina Klimczuk	Near-Earth object and satellite tracking activities at Ostrowik Observatory
special session on UZO		
15:00	Michał Żejmo	University of Zielona Gora Observatory in Chile
15:30	Tomasz Joachimiak	Expanding the Ecosystem: OCS Integration and Data Pipelines at the UZ Observatory
15:40	Magdalena Szkudlarek	Improving the efficiency of a small robotic observatory through automated scheduling: the ROTUZ case study
15:50	Andrzej Maciejewski	Open software application for SST data analysis
16:05	coffee break	
Optional meetings in small groups		
Friday 3.Sep		
Hands-on sessions and tutorials		
09:30	Lukasz Wyrzykowski	BHTOM2 and BHTOM3 detailed overview of features
10:15	Joysankar Majumdar	New features in BHTOM3 - data services, photometry, spectroscopy
10:30	Przemek Mikołajczyk	How to observe for BHTOM
11:00	coffee break	
11:30	Agnieszka Gurgul/Paweł Zieliński	group 1: BHTOM for beginners
11:30	Krzysztof Kotysz/Przemek Mikołajczyk	group 2: BHTOM data processing, upload and errors
11:30	Lukasz Wyrzykowski	group 3: BHTOM API hands-on
13:00	LUNCH	
14:30	Olivia Lynn	LSST LightCurveLynx tutorial
16:00	coffee break	
End of the workshop
